

LE Announces New Indianapolis Location

April 16th 2001, Morgan Hill, CA – Light Engineering (LE) announced today the opening of their Indianapolis offices. “The opening of our new Indianapolis location is a direct indication of our focus and commitment to the Power Generation and Automotive industries. From this location we can better collaborate with our clients in these markets and continue the commercialization of our technology,” said Matt Johnston, President of Light Engineering.

LE has developed and markets the industry’s leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.
