

## **LE Announces Facility Growth in Indianapolis** *Closure of San Jose Operations*

**October 15<sup>th</sup> 2001, Indianapolis, IN** – Light Engineering (LE) announced today that it had completed the relocation of its operations to a new facility in Indianapolis, and was proceeding with the transfer of operations from San Jose. “Today marks a new day for our company,” said Mathew Johnston, President and CEO of Light Engineering. “We have completed the move into our new production & testing facility in Indianapolis, a vital step required to accommodate our growth. We are also nearing completion of the transfer of operations from San Jose to this same location. Once completed, our San Jose location will be closed. This move enables us to focus on key business initiatives: Power Generation and Automotive applications.”

*LE has developed and markets the industry’s leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.*
