

## **LE Announces Completion of First Order for Automotive OEM**

**October 29<sup>th</sup> 2001, Indianapolis, IN** – Light Engineering (LE) announced today the completion of an automotive related development contract, and hinted at further contracts from the same client. “I am proud to announce the completion of our first automotive development contract,” said company President and CEO Matt Johnston. Mr. Johnston went on to say, “The development work has met all expectations and numerous improvements have resulted from collaboration with the client. Light Engineering is eager to begin the next phase of the project later this year”.

*LE has developed and markets the industry’s leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.*
