

LE Technical Team Leader Receives National Award

November 1st 2001, Indianapolis, IN – Light Engineering (LE) today announced that Dr. J.R. Fagan, VP of Engineering, has been awarded the “Outstanding Mechanical Engineer” (OME) award from Purdue University in West Lafayette, IN.

The award was established in 1991 to recognize those who have demonstrated exemplary accomplishments and leadership in industry, governmental service or other endeavors related to mechanical engineering.

“LE is very proud of Bob, his accomplishments, and the talent he brings to our team. Bob’s leadership of the technical team has proven invaluable to LE, and this award simply confirms something that we already knew,” said Mathew Johnston, president & CEO of LE.

LE has developed and markets the industry’s leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.
