

## **LE & Marathon Electric Showcase Products at PowerGen 2004**

**November 15<sup>th</sup> 2004, Indianapolis, IN** – LE today announced plans to showcase its variable speed products at this year's PowerGen tradeshow in Orlando, Florida. The LE product will be available in both the machine level products of Marathon Electric's MagnaSmart product line, as well as complete integrated GenSmart™ Power Generation Systems by LE.

"We're very pleased with the progress we've made together with LE. The interest in the product continues to be very strong and we expect many new product releases in 2005," said Ray Kacvinsky, VP of Power Generation for Marathon.

"This will be our second year at PowerGen with Marathon. Even last year when the partnership was announced, interest was overwhelming. That has continued to be the case today, but with Marathon's help we've been able to chart a clear course to commercialization and large scale production of the machines" said Matt Johnston, LE's President and CEO.

Marathon Electric, a subsidiary of Regal-Beloit, manufactures generators from 5 kW to 3,000 kW. The products are for 50 and 60 hertz and voltages up to 13,800 volts.

Regal-Beloit Corporation is a leading manufacturer of mechanical and electrical products for motion control and power generation. Headquartered in Beloit, Wisconsin, the company serves worldwide markets from its manufacturing, sales and service facilities located throughout the United States, Canada, Europe and Asia. The company's stock is traded publicly on the American Stock Exchange under the symbol RBC.

*LE has developed and markets the industry's leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.*
