

LE Hosts Open House/Client Appreciation Day at Indianapolis Motor Speedway

May 12th 2005, Indianapolis, IN – Light Engineering (LE) welcomed strategic partners to an Open House/Day at the Track event hosted at their Indianapolis, IN headquarters. LE's clients were treated to a tour of their Indianapolis facilities along with an exciting day at the Indianapolis Motor Speedway. Several companies participated in the Open House, which kicked off with LE hosting a hospitality gathering in the Legends Row suites located adjacent to the famed Gasoline Alley at the Indianapolis Motor Speedway. Clients were also given direct access to the garage area along with a "behind the scenes" look at the activity of teams preparing their cars for qualifications and race day.

This event gave key development and distribution partners of LE an opportunity to tour their Headquarters/Tech Center, as well as take an exclusive look at advancements in LE's technology and various applications demonstrated on site. "This event combined the excitement of the Indy 500 with the opportunity to eye witness LE technology applied to several applications and markets. Overall, this was a huge success" commented Jeff Whipple, Product Manager of Power Generation Products for LE.

LE has developed and markets the industry's leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.
