

Light Engineering Announces Manufacturing and Sales Joint Venture in China

May 7th 2007, Indianapolis, IN - Light Engineering (LE) announced today that it has completed a strategic joint venture in China with Dong Sheng Motor Manufacturing in Shenzhen, China. Dong Sheng is a leading producer of small motors for the appliance and whitewoods marketplace in Asia. "We could not be happier than to be able to announce our new partnership with Dong Sheng. DS is a very profitable company with a long history of financial success and performance. With this partnership, LE will be able to more quickly transfer machine production into a very high quality operation," said Mathew Johnston, President-CEO of LE. "Dong Sheng is a high volume motor producer with annual revenues of \$60M+. All manufacturing is done in its Shenzhen factory located in the Sha Jing district. With nearly 300,000 sq/ft of manufacturing space and 2000+ employees, DS can definitely assist LE in our overall growth plans. We're very pleased to have found such a great partner" said Johnston.

LE has developed and markets the industry's leading rotating machine technology for permanent magnet motors and generators. Our technology enables the LE GenSmart™ generators and SmartTorq™ motors that LE commercially sells today, and also is the building block for various new applications to come. The application of LE technology allows for greatly reduced machine sizes and active material contents, and thus has proven to be the cost leader in permanent magnet applications of 2 – 200 kW. LE is headquartered in Indianapolis, Indiana, USA, and has manufacturing operations in the Guangdong Province of China.
