Light Engineering Appoints Senior Vice President

Indianapolis, IN, August 15, 2011 — Light Engineering (LE) is pleased to announce the appointment of Ronald Sheldon to the position of Senior Vice President, Sales and Business Development.

A graduate of Western Governors University (BS, Business Management), Sheldon has held leadership positions in sales and business development for major manufacturers of specialized motor vehicles for more than twenty years. He has worked extensively in the Middle East, Africa, Europe, the Caribbean and Latin America where he has created growth with joint ventures, original equipment manufacturers, and through development of worldwide distribution networks. In his new role, Sheldon will oversee the LE expansion globally, focusing on growth in the electric/hybrid electric vehicle, power generation and industrial application markets.
